

Irrigation District Engineering and Technical Assistance

Pipeline Seepage Loss Testing

Seepage rates are being measured for both canal and pipeline segments to help account for water loss with the irrigation district distribution systems.

GPS Survey & Canal Ponding Testing

Post Lining Ponding Test

After districts has re-lining a canal segment our IDEA Team compares before and after seepage rates with a second seepage loss test.

Joint Rio Grande Basin Initiative Annual Conference

Lining Evaluation

Yearly evaluations and rating surveys to determine durability, long-term use, and maintainability of new canal lining.

District Telemetry Equipment Assistance

We work with districts to explore potential automation and telemetry projects, and help advise and setup telemetry equipment.

2007 Flow Management and Automation Workshop

Seepage rates are being measured for both canal and pipeline segments to help account for water loss with the irrigation district distribution systems.
